Genuine 24/7/365 multi-lingual customer support teams assist all parties involved – by phone, e-mail or online.

USER SECURITY

Your iRoom is available over the internet to authorized users only, at any time and from any location. Users and documents can be added or removed at any time at the click of a mouse. Each user you authorize defines their personal account with an automatically-generated secure password and second-level authentication via three personal security questions.

While in the iRoom each user is individually monitored, and real-time reports are automatically generated to allow you to track all user access and activities. The ‘Data Room policy’ is tailored to suit your needs and enforced by our team, to ensure the data room is played by your rules.

DATA INTEGRITY

All PDF documents can effectively be protected against printing, print-screen capture, download and content extraction. iRooms are built with an enhanced e-business architecture. Documents, messages and personal details sent over the internet are encrypted using 128-bit SSL protocol and a variety of additional security measures to prevent any information interception.

As security is nothing without availability, your iRoom service is designed for maximum availability: 24 hours a day, 365 days a year.

The Deloitte recognition was created on behalf of the Association of M&A Directors and involved the most prominent players in the market. A rating was given for each of the five main categories: set-up; users; security; Q&A and reporting. iRooms garnered 23 out of a total of 25 points.

“ We really appreciated your flexibility and high quality service throughout the transaction, especially your quick responses and turnarounds to our requests. ”
